The Imaging Mass Spectrometry Society (IMS) is a non-profit organization (501c). Our mission is dedicated to: 1) promoting the development and application of imaging mass spectrometry (IMS) in all applicable venues including academia, government, and industry, 2) enhancing the IMS community by disseminating best practices and acceptance

[MS Imaging Home of Mass Spectrometry Imaging](#)
This site is dedicated to sharing knowledge on mass spectrometry imaging (MSI, also termed imaging MS or MS imaging). In brief, this is an emerging field in science allowing true label-free molecular imaging of flat samples, e.g. biological tissue sections.

Imaging Mass Spectrometry identifies what you see at the molecular level iMScope TRIO transforms your data from just "Observation" to "Analysis" Optical microscopes cannot determine which molecules are localized in the region of interest. On the other hand, the positional information of molecules is lost in mass spectrometric analysis, where sample extraction and homogenization is needed for sample pre-treatment.
