Affect-Neuroscience.org Affect-Neuroscience.org

Understanding the Mechanisms behind Human Psychopathology Anxiety, depression and related affective disorders are the most prevalent mental health disorders worldwide, but the underlying mechanisms of emotions are also the least understood by modern science. Affective neuroscience is the study of the brain mechanisms underlying emotional behavior.

Daniel Reisel: The neuroscience of restorative justice ...

Daniel Reisel studies the brains of criminal psychopaths (and mice). And he asks a big question: Instead of warehousing these criminals, shouldn't we be using what we know about the brain to help them rehabilitate? Put another way: If the brain can grow new neural pathways after an injury could we help the brain re-grow morality?
