The neurological examination of the newborn baby ...
The need of a neurological examination for research purpose led to the development of several structured methods assessing specific neurological aspects. In the 1970s, Parmelee and Michaelis developed a quantitative neurological evaluation based on the Prechtl examination, with a total score grading the responses for each item. Practical Guide to Clinical Medicine: The neurological exam.

In general, the neurological examination is not applied in its entirety to asymptomatic, otherwise healthy people as the yield (i.e. likelihood of identifying occult disease) would be quite low.

Clinical Examination - Neurological Examination
Neurological examination may be a detailed assessment of the nervous system, following up a specific symptom or suspected disease, or a survey of the system, as part of a routine general examination. A detailed neurological examination can be time consuming and exhausting for a patient, and information obtained from a tired, fatigued, uncooperative or ill patient can be misleading.
