[United Nations](#) - [Wikipedia](#)

The United Nations (UN) is an intergovernmental organization tasked to promote and secure international co-operation and to create and maintain international order. A replacement for the ineffective League of Nations, the organization was established on 24 October 1945 after World War II with the aim of preventing another such conflict.

[Scientific opinion on climate change](#) - [Wikipedia](#)

Technological, economic, and policy choices in the near future will determine the extent of future impacts of climate change. Science-based decisions are seldom made in a context of absolute certainty. National and international policy discussions should include consideration of the best ways to both adapt to and mitigate climate change.
