What is the purpose of the water pump and timing belt in a ...

You replace the water pump at the same time, because most of these types of engines have the water pump in the same location as the timing belt. You don't want to spend the money for the labor to go back in there in a year or two when the water pump fails, so you pay the extra 60 to 100 bucks or so for the water pump at the same time.

Replace Water Pump when replacing timing belt ...

I think it all depends on how long you plan on keeping this 12 year old car. Since the water pump is driven by the timing belt, if you don't replace the pump now, and if it starts leaking later, you will wind up paying essentially the same labor costs later that you are paying now for timing belt replacement.

Symptoms of a Bad or Failing Water Pump - YourMechanic

It is an impeller pump and is usually buried under the timing belt cover on the side of the engine. The pump is operated by the engine's drive belt as the belt turns, the pump turns. Blades on the pump force coolant to flow through the engine and back to the radiator to be cooled by a forced air cooling fan.
